SKILLS

Programming languages:

Java, JavaScript, TypeScript, PHP, Python

Core Concepts:

Object-Oriented Programming (OOP),
SOLID Principles, RESTful API Design

Backend Technologies:

Spring Boot, Spring MVC, Spring Security,
JPA, Hibernate

Frontend Technologies:

ReactJS, Next.js, HTML5, CSS3, JavaScript,
Tailwind CSS, Bootstrap, Shadcn UI, JSP

Database:

MySQL, SQL Server, PostgreSQL

Development Tools:

Git, GitHub, Postman Docker

Cloud & Deployment:

Vercel

About Me

- A motivated Web Developer Intern with a focus on frontend development and a solid foundation in backend using Java Spring Boot. Skilled in building responsive interfaces with HTML, CSS, JavaScript, and React, as well as developing RESTful APIs and working with MySQL. Familiar with Git for version control and eager to grow as a full-stack developer in a professional team environment.

Education

- SAI GON UNIVERSITY 09/2021 - 03/2026
Information Technology
Major in Software Engineering - GPA: 7.50/10

Project

- Online Course Management System** 05/2025 - 07/2025
Team Size (5)
Link Website: [khoahoc.vietmyus](https://khoahoc.vietmyus.com)
Description: A web platform for managing online courses with user authentication, role-based access (Admin/Student), course catalog, enrollment, and profile management. Designed to simplify administration and enhance the learning experience.
Key Features:
 - User authentication via Google and system-provided credentials.
 - Video lesson streaming, commenting, and assignment submission.
 - Admin panel for course, user, and system management.**Role:**
 - Managed user and account information in the admin panel
 - Implemented personal profile management, course information, and progress tracking on the client side
 - Developed features for password settings and contact information in the client interface**Technical Stack:** Spring Boot, OAuth 2.0, JWT, Nextjs, TypeScript, Shadcn/ui, Tailwind CSS, MySQL, Docker, Vercel
- Website Job Finder** 12/2024 - 08/2025
Personal Project
Description & Key Features: A web-based job portal with role-based access (Employer/Candidate), supporting user authentication, job posting, search, application tracking, and profile management. Features include account management, skill-based registration emails, and granular role/permission control to streamline hiring and improve access to opportunities.
Technical Stack: Spring Boot, Spring Security, Spring Data JPA, JWT, Nextjs, TypeScript, Flowbite React, Tailwind CSS, MySQL, Docker, Vercel, Render
Github:
Backend: github.com/Lochoang21/JobHunter_BE
Frontend: github.com/Lochoang21/JobHunter_FE

Moment - Social Network

11/2024 - now

Team Size (4)

Link Website: moment.liber.vn

Description & Key Features: A web-based social media platform that enables users to connect with friends, share photos and receive notifications of friends new uploads. Designed to foster engaging, interactive social experiences.

Role:

- Implemented personal profile editing features
- Developed change password functionality for account security

Technical Stack: Spring Boot, Spring Security, Spring Data JPA, OAuth 2.0, JWT, Nextjs, TypeScript, ReactBootstrap, MySql, Docker, Vercel, Render, Cloudinary
